

E-Portfolio

E-Portfolio

A portfolio is a way of showcasing work samples and skills stated in your resume.

One of the ways of creating a simple portfolio is using GitHub pages. This is a site hosting service that takes HTML, CSS and JavaScript files directly from a repo on GitHub.

You can create a Project site and/or Personal site

create a new repository named *username.github.io*. Say if your name is trishduce, your repository name will be *trishduce.github.io*. This will be your homepage.

Create a new repository

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?

[Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner *

 trishduce ▾

Repository name *

/ trishduce.github.io

✔ trishduce.github.io is available.

Great repository names are short and memorable. Need inspiration? How about **cautious-dollop** ?

Description (optional)

☒  **Public**

Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**

You choose who can see and commit to this repository.

Initialize this repository with:

☐ **Add a README file**

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None ▾

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

Go to repository Settings and click on “Pages” on the left. Select “main branch” under the “Source”.

The screenshot shows the GitHub repository Settings page. At the top, there is a navigation bar with links for Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. The Settings page has a left sidebar with various configuration categories: General, Access, Collaborators, Moderation options, Code and automation, Branches, Tags, Actions, Webhooks, Environments, and Pages. The Pages category is selected and highlighted. The main content area is titled "GitHub Pages" and contains the following information:

- A description: "GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository."
- A section titled "Build and deployment" with a "Source" subsection.
- A button labeled "Deploy from a branch" under the Source section.
- A "Branch" subsection stating: "GitHub Pages is currently disabled. Select a source below to enable GitHub Pages for this repository. [Learn more.](#)"
- Two dropdown menus for selecting the source: the first is set to "main" and the second is set to "/" (root).
- A "Save" button to the right of the dropdowns.

Might take a few minutes

The screenshot shows the GitHub repository settings for 'ample.github.com'. The 'Settings' tab is selected in the top navigation bar. On the left sidebar, the 'Pages' option is highlighted under the 'General' section. The main content area is titled 'GitHub Pages' and contains the following information:

- GitHub Pages** is designed to host your personal, organization, or project pages from a GitHub repository.
- Your site is live at <https://trishduce.github.io/trishexample.github.com/>.
Last deployed by github-pages 1 minute ago. A 'Visit site' button is available.
- Build and deployment**
 - Source:** A button labeled 'Deploy from a branch'.
 - Branch:** Your GitHub Pages site is currently being built from the main branch. [Learn more.](#)
Below this, there are two dropdown menus: the first is set to 'main' and the second is set to '/ (root)'. A 'Save' button is to the right.
- Learn how to [add a Jekyll theme](#) to your site.

Check out the following websites to download free portfolio website templates from [colorlib](#), [Start Bootstrap](#), [Themezy](#), [BootStrap zero](#) or [Bootstrap made](#).

Each project can have a site – could put web site on a different branch.
